PROFESSIONAL PROFILE

Product and operating executive with nearly 20 years of pharmacy experience and 10+ years leading product development, digital transformation, and technology-enabled growth across healthcare and pharmacy. Deep expertise translating complex pharmacy workflows into scalable digital products, platforms, and operating models.

Progressive leadership across product management, pharmacy technology, enterprise implementations, strategic partnerships, and executive operations. Built and launched solutions across mail-order, specialty, compounding, pharmacy automation, digital patient engagement, fulfillment, and healthcare technology—partnering with major healthcare and retail organizations from concept through scale.

AI LEADERSHIP

Driving organization-wide AI adoption to accelerate product delivery, strengthen operating cadence, and improve pharmacy and patient experiences—establishing practical AI workflows across product, engineering, operations, and commercial teams while keeping regulated healthcare constraints front and center.

PROFESSIONAL EXPERIENCE

Epic Scripts

March 2025 – Present

Chief Operating Officer

Previously Chief Product Officer (Mar 2025 – Mar 2026)

Mail-order pharmacy and technology business — company-wide operating strategy across product, technology, pharmacy operations, and commercial functions.

- Lead company-wide operating strategy and cross-functional execution spanning product, technology, pharmacy operations, fulfillment, patient experience, and commercial growth.
- Translate strategic objectives into operating priorities, organizational plans, and scalable processes for a high-volume pharmacy environment.
- Bridge product and operational strategy so technology investment directly improves business performance and customer experience.
- **AI at scale:** Championed practical AI use across the organization—embedding AI-assisted product development, faster discovery-to-delivery cycles, and operating workflows that help teams ship, decide, and execute with higher leverage.
- As CPO, owned product vision and roadmap across pharmacy technology, automation, patient engagement, fulfillment, and digital pharmacy experiences—from market discovery through commercialization and optimization.
- Translated complex pharmacy workflows and partner requirements into scalable platform capabilities; aligned roadmap with regulatory, operational, and growth objectives.

Selected enterprise experience: Henry Meds, Hims & Hers, Hello Cake, Winona, and other B2B2C partners.

Wellsync

2022 – 2025

Vice President, Strategic Partnerships

Formerly Vice President, Product Development (2022 – 2024)

- Led development and negotiation of strategic partnership agreements—including program design, commercial structures, and financial analysis—connecting healthcare technology, pharmacy, employers, and digital health organizations.
- Moved partnerships from concept through implementation with product, technology, operations, and commercial teams; structured agreements for scalable, mutually beneficial growth.
- As VP Product Development, owned vision and execution for digital engagement and healthcare technology products, including white-labeled solutions connecting end users, self-insured employers, online care, and pharmacy providers.
- Built products across digital health, pharmacy, patient engagement, and employer-sponsored healthcare; prioritized and shipped multiple concurrent customer-driven initiatives.

Selected enterprise experience: Publix, The Vitamin Shoppe.

Cardinal Health

2021 – 2023

Senior Product Manager

- Led product and software teams through the full lifecycle for national retailers and major health systems—mail-order pharmacy, in-store pickup, third-party delivery, and patient-specific delivery.
- Partnered with engineering, pharmacy, operations, and customer stakeholders to turn complex healthcare workflows into scalable digital products and integrations.
- Awarded a U.S. patent for a dynamic-ordering solution designed to maximize patient orders and reduce waste.

Selected enterprise experience: Costco, major health systems, and other national healthcare and retail organizations.

Wegmans Food Markets

2015 – 2021

Implementation Manager, Digital Pharmacy Solutions

Pharmacy Technology Systems Manager (2018 – 2020) · Product Manager / Solutions Analyst (2015 – 2018)

- Led enterprise implementation of digital pharmacy solutions across 100+ pharmacy locations—education, operational readiness, adoption, and change management.
- As Pharmacy Technology Systems Manager, led onshore/offshore development teams; shipped digital mail-order experiences spanning mobile/web engagement, third-party integrations, and streamlined pharmacy workflows.
- As Product Manager / Solutions Analyst, used data and workflow analysis to drive automation and patient experience improvements; built an in-house Medicare Plan comparison tool; developed immunization registry integrations; and led custom development within McKesson EnterpriseRx and high-volume automation via McKesson HVS.

Earlier Pharmacy Experience

Licensed Pharmacist

Community pharmacy, medication management, patient care, and healthcare delivery—foundational expertise in pharmacy workflows and operational challenges that informed the transition into pharmacy technology and product leadership.

CAREER HIGHLIGHTS

- 20 years pharmacy & healthcare; 10+ years product & health-tech leadership
- Digital pharmacy implementations across 100+ locations
- Built products & partnerships across B2B, B2C, B2B2C, white-label & enterprise models
- Led distributed onshore/offshore product & engineering teams
- Pharmacist → PM → technology leader → VP Product → VP Partnerships → CPO / COO
- U.S. patent holder — innovative pharmacy ordering technology
- Drove org-wide AI adoption for product velocity and operating leverage
- Partners & platforms: Wegmans, Costco, McKesson, Publix, Cardinal Health, and more
